

Learning Clay Program

Learning Clay is a clay in the classroom program designed by 2Hands for elementary school teachers and their students. Comprised of three components, educators are sure to find the perfect fit for their creative classroom vision.

Curriculum

Component 1
Teachers, let us know what your class is currently learning, and we work with you to develop and deliver an artistic session. Curriculum enhancement sessions give children opportunity to create a tangible that represents the core of your lesson. Streams for both SK-JK students and Grades 1 through 4 are available.

Adventures

Component 2
Classroom clay adventures are all about exploration and fun! Children choose to create crafts that are close to their hearts (or funny bones) – owls, frogs, piglets! Students experience the joy of working with clay, discover form and colour, and also have opportunity to experience the excitement of a great unveiling!

Treasures

Component 3
The Treasures component is the perfect choice for teachers who'd like their classes create beautiful, long-lasting gifts that students' loved ones are sure to cherish. 2Hands helps the little ones in your class create art to those special days of celebration: Mother's Day, Father's Day, Family Day, Valentine's, and more...

For more information about 2Hands' Learning Clay Program, art for everyone, or to book your class' session, please contact us –
